SUMMARY

MotivatedITfresh graduate and freelancer with hands-on experience in MERN stack, React Native, IoT solutions, and full-stack development. Skilled in applying data science, machine learning, and deep learning concepts to real-world problems. Strong analytical and creative problem-solving abilities with a passion for building scalable applications and innovative solutions. Seeking an job opportunity to apply technical expertise, gain practical industry experience, and contribute to organizational success.

EDUCATION

B.Sc.(Hons)inInformation Technology (Specialization: Information Technology)

Sri Lanka Institute of Information Technology (SLIIT)
Graduated September 2025

B.Sc. (Hons) Joint Major in Electronics & CMIS (UG)

Wayamba University of Sri Lanka Current Year: 4th | Expected Graduation: 2026

RELEVANT PROJECTS

- **Payroll Management system for Karnivo Restaurant.**
  Restaurant (Nugegoda) withrole-based accesscontrol, employee registration, unique IDs with barcodes for attendance tracking, automated payroll (EPF/ETF, no-pay days), payslip generation, and leave/half-day request management. The system is mobile-friendly and responsive across all screen sizes.

  Technologies:- Mongo DB, React JS, Node JS, Express JS, Firebase Storage, Bootstrap 5
  Git Repo : https://github.com/HarithRajapaksha/PayRoll_Manegement.git

- **Feld Mobile app.** This project focuses on supporting people with disabilities by ensuring their safety and health
  through daily activity monitoring. It is built using the ESP32 board and includes stepcount tracking to encourage activity, real-time fall detection, and instant caregiver alerts during emergencies. By combining health monitoring with safety notifications, the system enhances care and protection for individuals with special needs.

  Technologies:- Esp32,firebase Realtime database, Reactnative, Express js, Node js
  Git Repo : https://github.com/HarithRajapaksha/FELD-iot-frontend-esp32-programming.git

- **Automated Wayamba University Medical center.**
  Developed an automated medical center system for Wayamba University, replacing the manual process. The system allows student registration details to be retrieved, shared with doctors for consultations, records medical information, and forwards prescriptions to the pharmacist, streamlining the entire medical workflow.

  Technologies:- React js, MongoDb, Express js,Node js
  GitRepo : https: //github.com/HarithRajapaksha/Wayaba_Uni_MedicleCenter.git

- **Gem Identification System Using CNN.**
  DevelopedaGemIdentificationSystemusing Convolutional Neural Networks (CNN) with TensorFlow. The system classifies and displays the type and name of a gem from an input image.

  Technologies:- Tensorflow,Keras,Python
  Git Repo : https://github.com/Shehan-Annasiwatta/DL-Assignment-Y4S1.git

- **Markit Up Project evaluation System.**
  Aweb-basedplatformdesignedtostreamline university research project management. The system includes separate logins for students, supervisors, examiners, and coordinators. Students can manage project groups, upload documents, and track progress. Admins can manage users, create assessments, generate mark sheets, and analyze grades with detailed reports and visualizations. Features include deadline reminders, automated notifications, presentation scheduling, examiner panel creation, and research paper verification.

  Technologies:- React js,Mongo DB,Firebase Storage, Express js, Node js
  Git Repo : https://github.com/Shehan-Annasiwatta/MarkIt-Up.git

LANGUAGES

- JavaScript
- Java
- Php
- HTML/Css
- TypeScript
- C/C++
- Python
- SQL
- Kotlin

FRAMEWORK AND TECHNOLOGIES

- React Js
- Node Js
- Express Js
- React Native
- Tensorflow
- Material UI
- Tailwind CSS
- Visual Studio
- Postman
- Android Studio
- Git & GitHub
- MYSQL & MYSQLWorkbench
- Bootstrap
- AWS
- Data structures and Algorithms
- VS Code
- XampServer & WampServer

PERSONAL SKILLS

- Logical and Analytical approach in solving problems.
- Leadership
- Thinking out of the box
- Time management
- Good Communication
- Self-Learning
